What are the hazards?	Who might be harmed and how?	What are you already doing to control the risks?	What further action do you need to take to control the risks?	Who needs to carry out the action?	When is the action needed by?	Done
<b>COVID-19</b>						
A person becomes unwell and believes they may have been exposed to COVID-19	Public Staff  Cross contamination of person to person transmission of COVID-19	If the unwell person is so ill that they require an ambulance the unwell person should be removed to an area which is at least 2 metres away from other people.  Whilst they wait for advice from NHS 111 or an ambulance to arrive, they should remain at least 2 metres from other people. They should avoid touching people, surfaces and objects and be advised to cover their mouth and nose with a IIR face mask when they cough or sneeze and put the tissue in a bag or pocket then throw the tissue in the bin. If they don't have any	Everyone advised if they feel unwell they should return home (avoiding public transport) and contact NHS direct.  If any staff reports with even a mild cough or low-grade fever (i.e. a temperature of 37.3 C or more) they should stay at home and self-isolate. This means avoiding close contact (1 meter or nearer) with other people, including family members. They should also telephone their healthcare provider or the local public health	LBB  Number 8 Site Manager	13.01.2020  As and when	Done via comms  Done
